

May Meeting Announcement

Volume – 41, Issue – 5, April 23, 2025

Topic: Cast-in-Place Concrete Structural Systems (1 PDH)

The seminar will present the major cast-in-place concrete building systems used today including flat slabs, slabs with beams, ribbed slabs, waffle slabs, podiums and their components including slab forms, wall forms, beam forms, column forms, flying forms, shoring and reshoring. Also presented will be both mild steel and post-tensioning systems along with what is available.

Speaker: Chad Anast, PE, LEED AP is the Tampa Office Manager for Ceco Concrete Construction, LLC (CECO). CECO, founded in 1912, is one of the largest concrete construction companies in the United States performing more than 200 projects yearly representing 20 million square feet each year. In 2007, Chad joined CECO as a Concrete Construction Engineer upon graduation from the University of Florida with degrees in Civil Engineering and Architecture. In 2021, he received an Executive MBA from the University of South Florida. He is a Professional Engineer in the State of Florida as well as a General Contractor and has extensive experience with low-rise and high-rise concrete structures.
